Objective

I am seeking a position where I can utilize my skills and give what I have to offer for future goals of projects/AI programming.

Experience

ACM club   Years: September 2017- 2018

- I attended multiple workshops that furthered my programming skills and team collaboration. We worked with PyCharm, so I know how to use and program with that IDE.

Program assistant   Years: February 2018 – current

- I held a position as a program assistant for a period of over a year at East Los Angeles College off site at Rosemead. My job duties entailed helping students register, enroll into classes, traveling to specific sites to register and enroll, and customer service. I constantly work with others and improved my collaboration when working in a team.

Education

California State University of Los Angeles   Fall 2017-present

I was recognized for my education achievements by receiving certificates from the honor roll during all the years I attended Garfield High School. To gain experience, I worked at the Garfield High School student store during my lunch break for 4 years. The ACM club has hosted many python workshops, which I attended to. I also attended the html workshops, so my skills as a programmer has expanded my knowledge in the web filed.

Skills

I am proficient in multiple languages, such as python, java, MySQL, NoSQL, MongoDB, and I have complete a data science course. Also, I have work with the front end and the back of html.
